

TEMPLATE: 2M TELESCOPICS DOUBLE SIDED

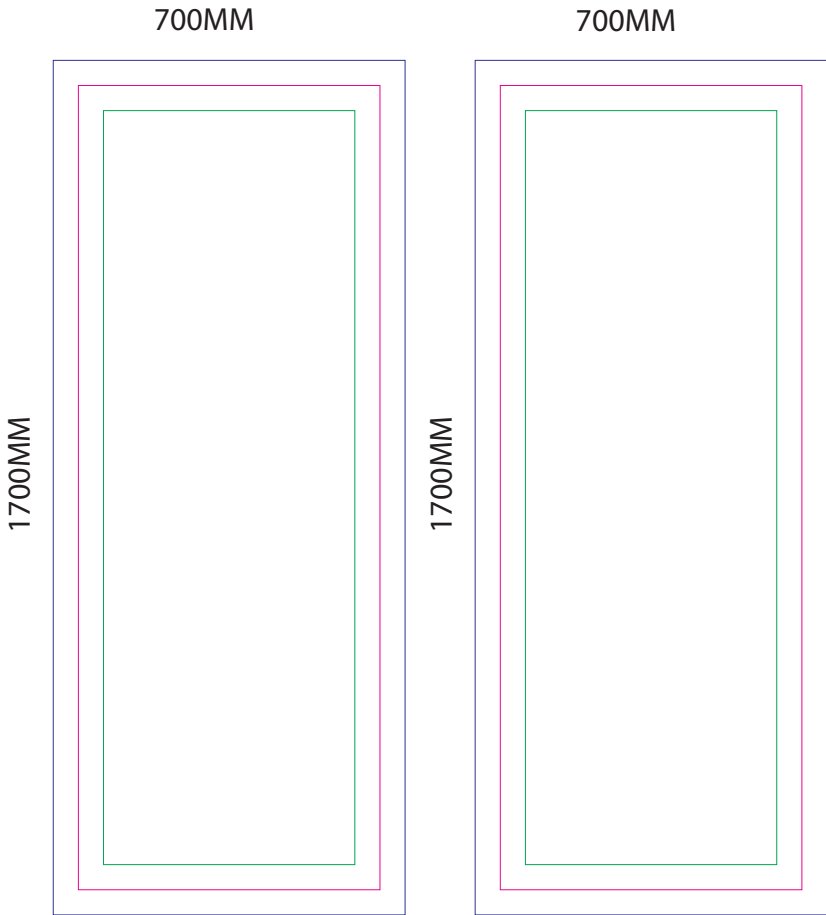

KEY

- The pink line indicates the bleed area.
- The blue line indicates where the item will be cut.
- The green line indicates the safe area.

CHECKLIST

- ☐ Convert all text to curves.
- ☐ Embed all images.
- ☐ Save artwork as a PDF.
- ☐ Supply rasterised artwork at a minimum of 200dpi, appropriately scaled to the template size.
- ☐ Use vector files for higher print quality (compared to JPEG or PNG files).

SCALE 1:15

IMPORTANT NOTICE

Please ensure that all artwork is supplied in CMYK, as RGB is not supported. The colour gamut in digital CMYK printing is limited, meaning that certain Pantone shades cannot be perfectly reproduced. While we make every effort to achieve the closest possible match, an exact replication is not always feasible. Colour variations are inevitable across different materials, such as PVC, fabric, and vinyl. Additionally, fluorescent and metallic Pantone colours cannot be directly replicated - only a tonal approximation is possible within our digital printing process.
